

1986-1991 Rear Toe Adjuster

PT.NO. E01-TROD

NOTE - These items are best used in conjunction with both the camber adjusters [awr-7420] and the outer bearing kit [AWR-7250]. These items will allow ease of camber and toe adjustments will maintaining constant with the rest of the rear suspension settings.

This kit includes:

- 2 toe rods with adjustable rod ends
- All mounting hardware
- Bushings

INSTALLATION: To install the toe link adjusters it is best done with the sub-frame out of the car, though it can be done in the car. You must bore the original ball joint bores out to 5/8". You must also drill out the control arm points in the same fashion. Bushings are supplied to downsize this bore to accept 3/8" hardware.

The inboard pick up point is best to have the bolt facing up from the bottom in case you have to replace it for any reason.
